

LOGISTICS

Tell us your requirements and we will fulfil them to the standards of safety and reliability that you expect. Extensive capacities combined with maximum safety compliance – when it comes to warehousing, value-added services and container terminals, we are able to provide efficient and flexible logistic solutions for your products.

Warehousing

Whether for commodity products or fine chemicals, modern single- and multi-client centres are the basis for efficient logistic solutions.

- Strategically chosen sites
- More than 220,000 square metres of warehousing
- 350 silos for the storage of solid products
- Storage of hazardous materials compliant with the most rigorous safety standards employing fire and gas alarms, CO₂ or foam extinguisher systems and leak-proof floors for all DG classes (except classes 1 and 7)
- Racked storage
- Temperature-controlled storage
- Approved intermediate waste storage facility
- Own railway sidings

Value Added Services

Our single- and multi-client centres also offer outstanding value-added services.

- Drumming and bagging facilities for all packaging types
- Other services for your products, ranging from sampling to refining
- Drumming and re-drumming of liquid products (harmless, DG and GMP)
- Drumming of molten and high-viscosity products.
- Bagging and re-bagging of powder, granules and coarse substances (harmless, ADR and GMP)
- Individual product handling (product mixing / nitrogen blanketing)
- Product analysis, sample preparation and despatch
- Customs clearance service
- On-site and off-site service
- Logistical analysis and consultancy

Container Terminals

TALKE offers containers that can be used as variable solutions for both transport and storage.

- Terminals in strategic locations
- Overall capacity in excess of 2,400 TEU
- ADR storage for classes 3, 8 & 9 (Hürth)
- Temperature-controlled storage (water/glycol cooling or steam heating)
- Own railway siding (Hürth)
- Direct connection to all value-added services at different sites
- Modern facility for inside and outside container cleaning (Hürth)
- Container servicing, inspection and maintenance

ALFRED TALKE
Logistic Services

Information Technology

- my SAP ERP & SAP LES with depot management und Handling Unit Management
- EH&S IT support module for the storage of hazardous materials
- Barcode and wireless data technology for the efficient administration of terminal and logistic facilities
- Our state-of-the-art IT systems enable us to use data formats such as CIDX, EDIFACT and SAP-IDocs to establish direct communication with our customers and to ensure comprehensive data management in all aspects of our work.
- We are of course also connected to TransWide and Elemica

Quality and Safety

The safety and security of any goods entrusted to our care is paramount. We therefore place special value on the training and development of our staff, on the technology and functioning of our vehicles and equipment, and the continuous improvement of all our procedures. People are the focus of everything we do; implementing requirements for workplace safety, quality and environmental protection is a key task for all of our employees.
