

TRANSPORT

As a specialist in the transportation of liquid goods, solid materials and packed goods, we can offer you bespoke logistic solutions tailored to the needs and requirements of your products. Using the most up-to-date vehicles, innovative technologies, well-trained employees and a dense network of branches and partners, we make it possible for you to respond in an extremely flexible manner to market movements and stay ahead of the competition.

Liquid Bulk Transport

As a leading European logistic service provider, the TALKE group can offer effective logistic solutions for the transportation of your hazardous and non-hazardous liquid materials.

- Pan-European intermodal and road transport
- Development of product-specific and customised transport concepts (special delivery and decoupled transport)
- More than 1,000 tanker and container vehicles
- Single-compartment / multi-compartment vehicles
- Stainless steel / rubber-lined / insulated tanks and containers
- Specialised equipment designed to meet individual customer needs for road and intermodal transport

Dry Bulk Transport

TALKE also has the perfect solution for your transport needs for granulates and powders.

- Pan-European intermodal and road transport
- Development of product-specific and customised transport concepts
- Specialised equipment designed to meet individual customer needs for road and intermodal transport
- 310 silo trucks
- 250 pressurised silo containers
- 40 hazardous materials containers
- 550 unpressurised containers (also suitable for storage solutions)
- Tipper chassis
- Rotary valves

Packed Goods Transport

Of course, we also undertake the transport and distribution of your packed goods. As lead logistics provider, we concentrate large product volumes at our partner networks to create efficient transport chains.

- European FTL/LTL transport concepts
- European network for groupage transport
- Transport of palletised goods in bags or drums, Big Bags, IBCs, commercial samples for all hazardous materials classes (except 1 and 7)
- Temperature-controlled transport
- Waste disposal
- Freight services, e.g. customs clearance

ALFRED TALKE
Logistic Services

Information Technology

- Freight processing using Transport Management System
- Entire fleet equipped with GPS tracking equipment
- Our state-of-the-art IT systems enable direct contact to the customer and ensure comprehensive data management across all areas
- Of course, we also have electronic data transfer systems that are fully integrated into our Transport Management System (TransWide, Elemica, SAPI-docs, etc.)

Quality and Safety

Our highest priority is the safety of the goods with which we have been entrusted. Therefore, we make certain that our employees are thoroughly trained that our vehicles and logistics plants are efficient and state-of-the-art, and that all our workflow processes are continually improved.
